ABOUT ME

Motivated and dedicated Full Stack Developer with a passion for creating efficient and scalable web solutions. Possesses a strong foundation in creating dynamic websites/applications, coupled with a keen eye for detail and problem-solving skills. Excels in collaborating with cross-functional teams to deliver high-quality projects. Committed to continuous learning and staying updated with the latest web development trends and technologies. I wish to further improve my knowledge of C# and ASP.NET.

SKILLS

C# / ASP.NET AWS / Cloud
Javascript (jQuery) / React / Vue
TDD / Responsive Web Design
SQL / NoSQL Unix / GIT
PHP / Laravel

WORK EXPERIENCE

Jan 2023 – Nov 2023

Prodo, Digital Agency (Chester)

.Net Developer

- Technologies used on these projects includes C#, .Net 6 Core, ASP.Net
- Collaborated on creating Web & Rest APIs, created swagger documentation for REST endpoints.
- Utilized coding practices OOP and created tests where required. Also as optimizing page loading speed
- Also other tech such as HTML, CSS Preprocessors. Jira/Confluence for ticketing & Library.
- Collaborated with a group of engineers to create features. A mix of both frontend and backend.

Dec 2021 – Dec 2022

Bluetel, Technical agency specializing in cloud based software. (Birmingham)

Software Engineer

- Working on a variety of client projects which involved good communication skills and collaboration.
- Worked on improving the CMS back office to provide enhancements to the dashboards, improving the internal user testing performance. Used Symfony and Ibexa API's.
- Participated in code reviews and provided constructive feedback to improve code quality and maintainability.
- Performed testing and bug fixing to ensure a seamless user experience with the use of Cypress testing framework.
- Implemented AWS Lambda Functions and decoupling into micro-services, using lightweight framework Gatsby and the usage of React.

June 2021 – Dec 2021

Gough Bailey Wright, Strategic PR, Content and Creative marketing. (Bromsgrove)

Web Developer

- Created bespoke designs using Wordpress CMS based on design specs provided. Learned how to use AWS to provide seamless integration & deployments.
- Managed existing Laravel projects, and configured API feeds & deployments via Laravel Forge.
- Worked closely with the designer team to exceed expectations.
- Learned and applied best practices from AWS on CI/CD.
- Contributed to existing Laravel projects.
- Improved website usability, custom plugin solutions on Wordpress.
- Strong focus on data protection and client security and roles management

May 2018 – June 2021

ComputerAssistance, Wiseserve Ltd (Oxford)

Web Developer

- Developed and maintained PHP-based CMS and website platforms. Collaborated within a small team of engineers to enhance existing software and deliver greenfield coding projects.
- Optimized MySQL database queries resulting in a 25% reduction in page load time for database-driven websites.
- Implemented responsive design techniques and mobile-first approach resulting in a 20% increase in mobile conversions. Both Wordpress and our in house Laravel ticketing solution.
- Refactored legacy codebase to adhere to best coding practices, resulting in a 30% improvement in code maintainability.
- Integrated third-party APIs for seamless data exchange and enhanced website functionality, resulting in a 15% increase in user engagement.
- Collaborated with cross-functional teams to identify and resolve software bugs, resulting in a 25% decrease in bug reports.

Academic Qualifications:
